SUMMARY

Experienced Software Engineer with a proven track record of designing, developing, and delivering secure, scalable, and high-performance enterprise applications. Specialized in C#, .NET, ASP.NET Core, and Microsoft Azure, with expertise in Software Architecture, Microservices, Clean Architecture, Domain-Driven Design (DDD), CQRS, and Design Patterns. Skilled in building cloud-native banking, fintech, SaaS, and workflow automation solutions while collaborating with cross-functional teams to deliver business-critical systems. Passionate about solving complex engineering challenges, driving technical excellence, and continuously adopting modern technologies and best practices.

SKILLS

- Languages & Frameworks: C#, .NET, ASP.NET Core, Entity Framework, SQL Server
- Architecture: Clean Architecture, Domain-Driven Design (DDD), CQRS, Microservices, REST APIs
- Cloud & DevOps: Microsoft Azure, Azure DevOps, Docker, CI/CD
- Version Control: Git, GitHub
- Databases: SQL Server, PostgreSQL, MongoDB, Redis
- AI & Productivity: GitHub Copilot, ChatGPT, Claude
- Methodologies: Agile (Scrum), Test-Driven Development (TDD)

WORK EXPERIENCE

Wema Bank Plc | Lagos, Nigeria

Senior Software Engineer • Present

- Designed and developed secure APIs for Agency Banking and Merchant Banking platforms, supporting agent onboarding, merchant onboarding, POS lifecycle management, settlements, and transaction processing.
- Built and maintained enterprise banking solutions including transfers, withdrawals, bill payments, airtime, data services, account opening, and card operations.
- Developed backend services using C#, .NET, ASP.NET Core, SQL Server, Entity Framework, Clean Architecture, DDD, CQRS, and Microservices.
- Integrated banking applications with Finacle, third-party payment providers, and POS platforms through secure RESTful APIs.
- Optimized high-volume transactional systems, improving performance, reliability, and scalability across banking services.
- Collaborated with cross-functional teams using Azure DevOps for Agile planning, source control, code reviews, CI/CD, and release management.
- Troubleshoot and resolved production issues while ensuring high availability and operational excellence of mission-critical banking applications.

Uridium Technologies | Lagos, Nigeria

Senior Software Engineer • 2026

- Designed and developed enterprise banking solutions using .NET, Azure, SQL Server, Microservices, and Azure DevOps.
- Built secure APIs using Clean Architecture, DDD, and CQRS.
- Delivered solutions for cross-border payments (PAPSS), treasury, access management, fraud reporting, and branch transfer systems.
- Collaborated with cross-functional teams using Azure DevOps to deliver scalable, cloud-native enterprise applications.

Revent Technologies | Lagos, Nigeria

Senior Software Engineer • 2024

- Participated in solution architecture and product design, creating UML, use case, class, and database models.
- Developed scalable SaaS applications, including dynamic form-building and workflow automation platforms.
- Built reusable backend services and integrated third-party APIs to extend platform capabilities.

- Implemented real-time collaboration features and optimized application performance and responsiveness.
- Collaborated with cross-functional teams to deliver high-quality, customer-centric software solutions.
- Performed testing, debugging, and code optimization to ensure application stability, scalability, and maintainability.

Epoch Loop Technologies | Ogun State, Nigeria

Software Developer • 2019

- I played a role in the development of an incident application that monitors events globally.
- Engaged actively in the development of an e-commerce website, contributing to its development and overall implementation
- Participated in code reviews to ensure high-quality and maintainable code is being produced.
- Troubleshooted and debugged code to ensure it is working correctly and efficiently.
- Conduct code reviews and provide feedback to improve code quality
- Develop and execute unit tests and perform system testing to ensure software quality
- Contribute to the continuous improvement of software development processes and best practices

E D U C A T I O N

Master in Energy Economics

University of Ibadan • 2018–2020

Bachelor of Engineering in Mechanical Engineering

Federal University of Technology, Akure (FUTA) • 2010–2015
